List of Figures

Figure 1 *Glaciers* form an important part of the earth's climate system. 1

Hello Typst in Positron!

This is a basic example of **typesetting** with Typst. Check out this math formula:

$$v(t) = \lim_{t \to \infty} \int_t^\infty c \cdot \sqrt{t^2} \, \mathrm{d}t$$

Sub-section

1. The climate
2. The topography
3. The geology

Figure 1: *Glaciers* form an important part of the earth's climate system.

A picture of melting glaciers is in Figure 1. This is also described in [1]

The equation $Q = \rho A v + C$ defines the glacial flow rate.
